

Vážení přátelé,

předložený index, zachycuje pouze část rozsáhlého sortimentu mojí firmy – čarovníkové formy rostlin. Věnuji se pochopitelně pěstování všech druhů okrasných dřevin. Jednotlivé kultivary jsou vedeny v menších počtech, ale zastoupeny ve velkém množství co do rozmanitosti, včetně botanických, nebo i málo známých kultivarů. Rostliny jsou výhradně mými výpěstky, jsou tak od samého začátku svého růstu zvyklé na naše klimatické podmínky a tím dosahují bezproblémového růstu. Začínal jsem v roce 1991 z ničeho, kromě vlastního pozemku a silné vůle něco dokázat. Samozřejmě v mládí předcházelo studium na odborných školách, následná praxe v oboru a velká záliba v pěstování konifer, ovšem v omezeném množství. Využil jsem možnosti vybudovat vlastní firmu a pěstovat okrasné dřeviny, jak se říká - ve velkém. V současnosti mám dvě okrasné školky. Má to štěstí, že podnikání v zahradnickém oboru je zároveň i mojí zálibou. Léta spolupracuji s Přemkem Podlahou, vystupoval jsem často v jeho pořadech. Získal jsem přátele v Holandsku, Rakousku, Německu, Polsku, v Rusku i dalších zemích. Často přijíždějí podívat se na pěstitelské novinky. Tak jako jsou vítáni oni, budete i vy. Přijďte, těším se velice na Vaši návštěvu.

Miroslav Malík

Dear Friends,

presented index shows only a part of the company assortment - witches broom plant forms. I am planting of course all kind of park and garden trees. Particular cultivars are planted in small numbers but with maximum variability of not well known cultivars. All plants are planted by me, so they are fully comfortable with our climate. Everything started in 1991 just with passion and peace of land. I personally have started when I was young with studying of the literature and special schools. Praxis followed and planting was my hobby in small, of course. I luckily managed to start making business of my hobby. For a long time I am cooperating with Přemek Podlaha and have often be a guest in his TV show. I have a lot of friend in Netherland, Austria, Germany, Poland Russia and other countries. They are often coming to see new cultivars or plants. As they are welcomed, so you will. I am looking forward to see you.

Miroslav Malík

Sehr geehrte Freunde,

Der vorgelegte Index zeigt nur einen Teil umfangreiches Sortiments der Firma – die Hexenbessenform von Pflanze. Ich widme mich dem Bau aller Sorten der Ziergehölze. Einzelne Kultivare werden bei mir in kleineren Zahlen, aber in grossen Mengen von vielfältigen, inklusiv botanischen oder auch wenig bekannten Kultivare eingeführt. Die Pflanzen sind ausschliesslich meine eigene, sie sind von Anfang an unsere klimatische Bedingungen gewohnt und deswegen erreichen sie einen problemlosen Wuchs. Ich habe im Jahr 1991 angefangen nur mit eigenem Grundstück und mit starkem Wille etwas zu beweisen. In der Jugendzeit absolvierte ich ein Fachschulstudium mit Praxis und dazu die Vorliebe die Konifere im Kleinen zu ziehen. Später habe ich die Möglichkeit eine eigene Firma aufzubauen und Ziergehölze im Grossen zu ziehen. Zur Zeit habe ich zwei Ziergärten. Ich habe Glück, dass das Unternehmen im Gartenbau gleichzeitig mein Hobby ist. Lange Zeit arbeite ich mit Herrn Přemek Podlaha zusammen und habe auch oft in seinen Fernsehprogramme mitgeteilt. Viele Freunde habe ich in Holland, Oesterreich, Deutschland, Polen, Russland und in weiteren Ländern gewonnen. Sehr oft kommen meine Freunde um meine Pflanzenneuheiten bei mir anzusehen. Auch Sie werden bei mir herzlich willkommen zu heissen. Ich lade Sie herzlich ein, ich werde mich auf Ihren Besuch sehr freuen.

Seznam sebastianů

V tomto seznamu jsou seřazeny chronologicky, tak jak byly nalezeny, v rozmezí let 2001 až 2012 čarovníky nejen na Hoře Sv. Sebastiana – po níž nesou souborný název. Čísla u rostlin jsou pořadovými čísly nálezu. Jedná se o zcela jedinečnou sbírku – světový unikát – který je u mne možno shlédnout. Jeho historie je popsána v souboru „Jak dosáhnout tisícovku WB“, kde je možné zjistit nejen kdo, který kultivar nalezl, ale také se podívat jak vypadá.

LIST OF SEBASTIANS

This list is arranged chronologically, as Sebastians have been found, between the years 2001 to 2012. Contains Witches brooms found only on the Mount St. Sebastian - which bear the name of the list. Numbers of plants are findings serial numbers. It is a completely unique collection - unique in the world - which can be seen at my arboretum. Its history is described in "How to achieve a grand WB", where you can find not only one who found the cultivar, but also to see how it looks.
